**of Correction**

SECOND REQUEST FOR CERTIFICATE OF CORRECTION

Commissioner for Patents:

A certificate of correction is respectfully requested in the above-identified patent.

The applicants appreciate the time and courtesy of SPE Loke during a telephone conference of the undersigned attorney on October 24, 2006. During that telephone conference, SPE Loke agreed that a request for certificate of correction, filed on May 12, 2005, was partially denied by mistake.

A first request for certificate of correction was filed on May 12, 2005. That first request was partially denied in a letter dated July 27, 2006. The July 27 letter stated that the alleged error in column 7 was correctly printed. A certificate of correction was issued on August 29, 2006 for the error in column 9, but not for the error in column 7.

The applicants respectfully submit that the first request for certificate of correction was denied incorrectly. In an Amendment dated June 14, 2004, lines 10-11 of claim 15 (lines 1-2 of page 6 of the Amendment) recite --forming a second insulating region on the **first** conductive region and the first insulating region;-- (emphasis added). In claim 14, column 7, line 63 of the issued patent, that line was incorrectly changed to --forming a second insulating region

on the **second** conductive region and the first insulating region;-- (emphasis added). The first request for certificate of correction correctly pointed out that USPTO mistake, and thus, the first request for certificate of correction should not have been denied.

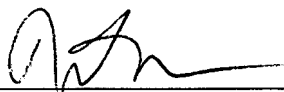

Accordingly, a second certificate of correction is respectfully requested in the above-identified patent.

The following error has been made:

In Claim 15, line 10, as Amended on June 14, 2004, --forming a second insulating region on the first conductive region and the first insulating region-- was incorrectly changed to "forming a second insulating region on the second conductive region and the first insulating region" in Claim 14, column 7, line 63 of the issued patent.

Attached is form PTO/SB/44, which indicates the corrections to be made, by reference to the column and line number in the printed patent. Because the errors were made by the Patent Office, no fee is necessary. However if they are determined to be our errors, the Commissioner is hereby authorized to charge payment of any fees associated with this communication to Deposit Account No. 19-1090.

Respectfully submitted,  
SEED Intellectual Property Law Group PLLC
